# THE VISION, MESSAGE AND OBJECTIVES

## THE VISION

Serious contribution to the scientific establishment to create colleges, institutes, scientific departments, branches and research centers, higher and evening studies of the university in accordance with the governing regulations and conditions, as well as building a solid information base of all colleges, institutes and office of the university, in order to provide the necessary information to make correct decisions.

## THE MESSAGE

Serious pursuit of achieving leadership and excellence in the fields of technical education for technological, medical, agricultural and administration, so that our university is among the best Iraqi, Arab and international universities in the field of producing knowledge appropriate to the real needs of society and actively contributing to the advancement of technical education according to the university's specializations as a tool for achieving sustainable economic development in Iraq. By adopting applied educational curricula that keep pace with what is being adopted in the most prestigious countries of the world in the technical fields, following up on developments and adopting them in vocabulary and academic courses first-hand

# THE VISION, MESSAGE AND OBJECTIVES

After aligning them with the real needs of the business market, and opening horizons for cooperation and interaction with the public and private sectors, and providing small and medium enterprises with our graduates and researchers with staff Able to develop these projects, which are a development tool for many developed countries of the world and form work teams that keep pace with the latest of science and committing to the ethics of the profession, adopting international academic accreditation standards to provide research and advisory services that respond to the needs and aspirations of society in accordance with applicable scientific standards.

## OBJECTIVES

- 1- Providing the society with high-quality staffs who are capable of adopting modern technologies that satisfy the work environment.
2. Continuous field follow-up to the real technical needs of the different sectors, developing programs and vocabulary to study the scientific departments that meet these needs.
- 3- Opening strategic partnership channels with Arab and international universities in the field of scientific research and serious cooperation to develop the capabilities of professors and students to enable them to communicate with the latest of science.

# THE VISION, MESSAGE AND GOALS

4- Accomplishing sound field scientific research compatible with the latest of science and publishing it in international journals.

5- Continuous search for the latest scientific developments with the aim of introducing them to the school curricula for the purpose of developing them.

6. Interacting with different sectors, discussing their real needs, providing scientific and societal consultations, and holding development courses for all state departments and segments of society.

7. Follow-up of graduates and their participation in courses that renew their theoretical and field knowledge to be more qualified and pioneering.

8- Developing the capabilities of teachers and involving them in modern teaching methods courses and field workshops inside and outside Iraq.

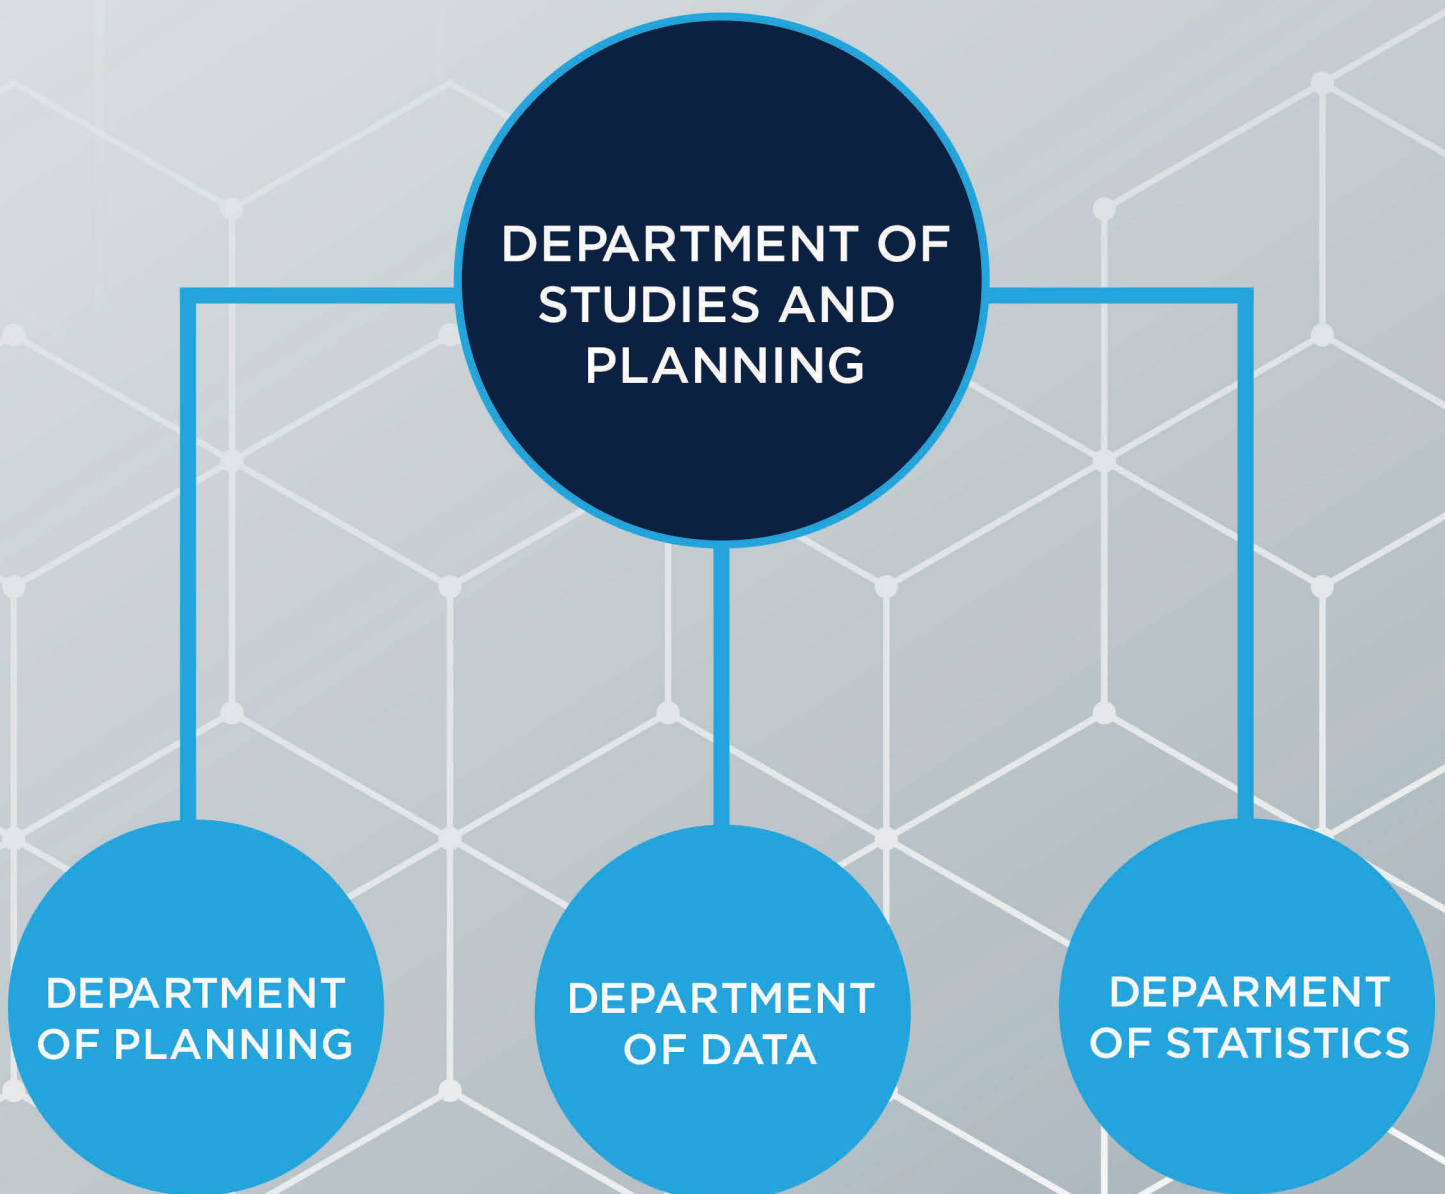

9. Adopting a culture of quality and academic accreditation in all technical university joints and formations.

10. Encouraging the development of postgraduate studies with modern and contemporary paths based on gender, not quantity, and in modern disciplines.

11- Re-engineering operations at the level of each department and its division towards establishing the rules of electronic performance and advancement.

12. The introduction of automation and electronic archiving in all the tasks of the people and departments in the university, all its formations.

# DIVISIONS OF THE STUDIES AND PLANNING DEPARTMENT

The Department of Studies and Planning is one of the scientific departments of the Northern Technical University affiliated to the Assistant President of the University for Scientific Affairs, as the Department of Studies and Planning includes the following divisions:

**1- DATA AND INFORMATICS DIVISION**

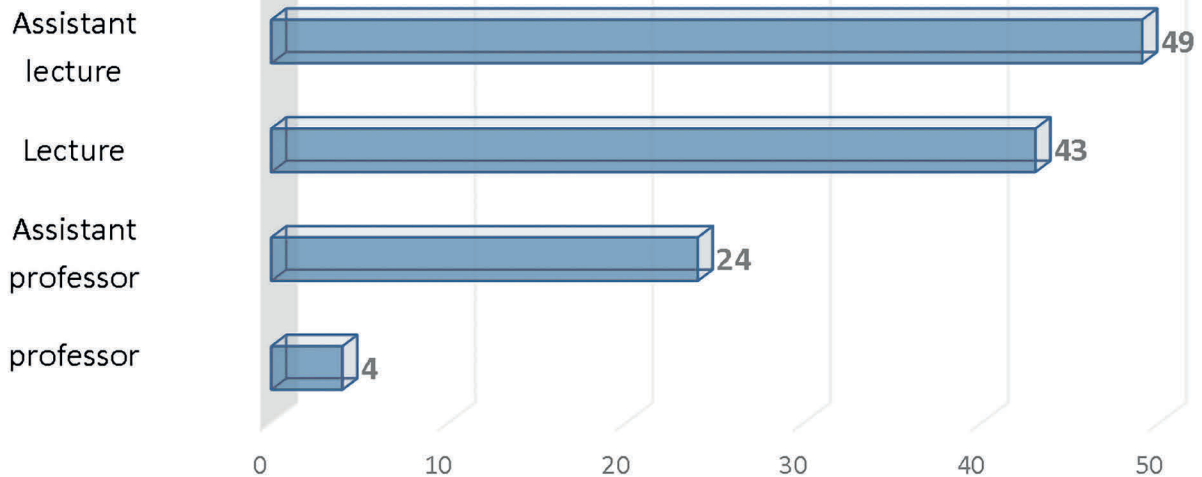

**2- PLANNING DIVISION**

**3- STATISTICS DIVISION**

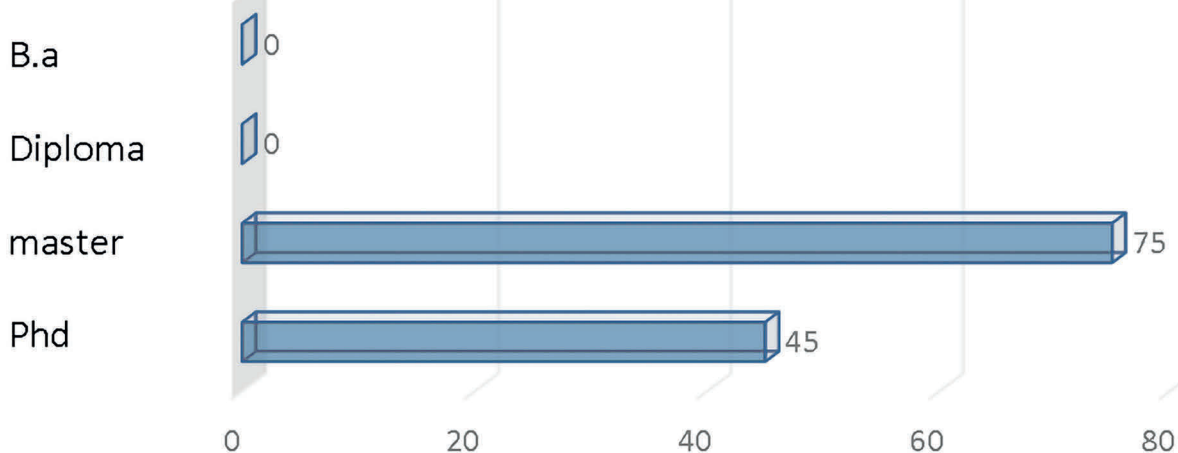

# DATA AND INFORMATICS DIVISION

The main task of the Data and Informatics Division is to assist the decision-makers to take the correct ones based on the information required from the division by creating an electronic database for the university's formations through which any information can be obtained from the computer Completion of the admission plan for the university's departments, branches, colleges and institutes and for the morning and evening studies, as well as the indicators that measure the university's activities and formations.

# PLANNING DIVISION

Works to create colleges, institutes, departments, and scientific branches, in addition to graduate studies and evening studies, according to the regulations and conditions in force, with the aim of horizontal and vertical expansion in a way that serves a larger segment of students in Nineveh Governorate and other governorates.

## INTRODUCTION OF NEW MORNING STUDIES :

College of Health and Medical  
Techniques  
Mosul / Kirkuk

Medical Laboratory  
Techniques

Community Health  
Techniques

Anesthesia Techniques

Tissue and Healthy  
Plants Techniques

Physiotherapy  
Techniques

Radiology Techniques

Dental making  
Techniques

Optics Techniques

# PLANNING DIVISION

## INTRODUCTION OF NEW MORNING STUDIES :

Engineering Technical College  
-Mosul-

Laser and Electro-optics  
Techniques

Geomatics Engineering  
Techniques

Environmental and  
Pollution Techniques

Accounting Techniques

Health Institutions  
Managing Techniques

Oil Institutions Managing  
Techniques

Total Quality Management  
Techniques

Banking and  
Financing Techniques

Management Technical College  
-Mosul-
