

Department lecturers research 2020/2021

Name of researcher	Title of resrech	Research link
Maha Elttayef Jasim	Synthesis and characterization of some heterogeneous ring-type compounds with a number of their complexes	https://www.proquest.com/openview/2f57965f2d098648a30f0ae3b68ea6e7/1?pq-origsite=gscholar&cbl=2042720
Nadia Yousif Salih	Preparation of nitrile derivative and study its effect as a possible novel drug for diabetes	https://www.researchgate.net/publication/341911825_Preparation_of_nitrile_derivative_and_study_its_effect_as_a_possible_novel_drug_for_diabetes
Nadia Yousif Salih	Synthesis, biochemical and histological study of captopril derivatives as a possible drug for diabetes	https://pubs.aip.org/aip/acp/article-abstract/2292/1/030005/726629/Synthesis-biochemical-and-histological-study-of?redirectedFrom=fulltext
Nadia Yousif Salih	Effect of a Metformin Derivative Containing Nitrile Group on Some Biochemical Variables in Rabbits Induced by Alloxane	https://www.annalsofrscb.ro/index.php/journal/article/view/617
عبير طالب عبد القادر	Rheumatoid Arthritis and the Relationship of the Disease to Sex and Age and Some Hematological Variables for Affected Patients	http://annalsofrscb.ro/index.php/journal/article/view/3271
Abeer Talib Abdulqader Khansaa Basem Fadhil	Energy improvement using Massive MIMO for soft cell in cellular communication	https://iopscience.iop.org/article/10.1088/1757-899X/928/3/032009/pdf
