Prof. Dr. Shihab Ahmed Yossuf

TEMPLATE FOR PROGRAMME SPECIFICATION

HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

PROGRAMME SPECIFICATION

This academic program description provides a brief summary of the most important characteristics of the program and the learning outcomes expected of the student to achieve, proving whether he has made the most of the available opportunities. It is accompanied by a description of each course within the program

| | |
|--|--|
| 1. Teaching Institution | Northern Technical University |
| 2. University Department/Centre | Technical Agricultural College / Mosul |
| 3. Programme Title | Department of Combating Deserification Techniques |
| 4. Title of Final Award | Bachelor of Agricultural Technical Engineer |
| 5. Modes of Attendance offered | Decisions |
| 6. Accreditation | Ministry of Higher Education Scientific Research |
| 7. Other external influences | Scientific updates Panel discussions on climate change and combating desertification |
| 8. Date of production of this specification | 8/1/2024 |
| 9. Aims of the Programme | |

The program aims to prepare qualified technical staff who possess some qualities such as:

Increase water use efficiency, dry agriculture, water reuse, water harvesting, reduce the impact of wind erosion and stabilize sand dunes.

High skills in various sciences and disciplines of anti-desertification techniques in controlling remote irrigation management and smart irrigation, designing and building structures for water harvesting facilities, using computers in predicting wind erosion, designing structures and facilities for stabilizing sand dunes.

Promoting the concepts of combating desertification and the extent of its comprehensiveness of local, regional and global damages.

Preparing the graduate to be successful in completing his scientific career by obtaining certificates after the technical bachelor's degree and providing broad attention to the problems that arise in Professional practice including teamwork, leadership, occupational safety, ethics, service and economics.

10. Learning Outcomes, Teaching, Learning and Assessment Methods

A. Knowledge and Understanding

1. Master soil science (physics, chemistry and soil fertility) which is in contact with the management of techniques to combat desertification.
2. Mastering the sciences of water management (weather, irrigation methods and methods, water harvesting, water reuse).
3. Diagnosis of signs of desertification, resistance to wind erosion and stabilization of sand dunes.
4. dry agriculture and conservation agriculture drought-resistant plant varieties

B. Subject-specific skills

1. Ability to diagnose desertification.
2. Ability Manage operations of controlled irrigation and smart irrigation.
3. The ability to manage water in the design of water harvesting facilities.
4. The ability to manage water in water reuse (trocar water and waste water).
5. The ability to use modern technical applications and tools in the completion of necessary tasks.

C. Thinking Skills

1. brainstorming.
2. Ability to analyze.
3. Problem-solving ability.
4. Ability to deduce

D. General and Transferable Skills (other skills relevant to employability and personal development)

1. Ability to work in a team.
2. Ability to communicate effectively.
3. Effective influence on society and the labor market through Training and development programs related to specialization at various levels.

Teaching and Learning Methods

Lecture.

- Lab.
- Systematic training.
- Projects
- Summer training.

| Assessment Methods | | | | | |
|---|------------------------------|-------------------------------------|----------------------|---------------------------------------|------------------|
| Daily , Monthly , Final examination and weekly reports | | | | | |
| 11. Programme Structure | | | | | |
| Level/Year | Course or Module Code | Course or Module Title | Credit rating | Credit hours one hour per week | |
| | | | | theoretical | practical |
| Level 1 | TAMO1 | Combating Deserification Techniques | Autumn | 14 | 21 |
| Level 1 | TAMO1 | Combating Deserification Techniques | spring | 14 | 14 |
| Level 2 | TOMO2 | Combating Deserification Techniques | Autumn | 15 | 21 |
| Level 2 | TOMO2 | Combating Deserification Techniques | spring | 12 | 20 |
| Level 3 | TAMO3 | Combating Deserification Techniques | Autumn | 15 | 16 |
| Level 3 | TAMO3 | Combating Deserification Techniques | spring | 13 | 15 |
| Level 4 | TAMO4 | Combating Deserification Techniques | Autumn | 12 | 15 |
| Level 4 | TAMO4 | Combating Deserification Techniques | spring | 12 | 16 |

| Study Level (First) | | | | | | |
|--------------------------------|-----------------------------------|------------------------------------|----------------------------------|------------------------|-------------------------|---------------|

13. Personal Development Planning

Faculty members must be within the prescribed staff and according to the ratio of students to the number of faculty members and must Competence should have a role to cover all curricula, There must be a capacity to manage the college adequately to accommodate levels of interaction, student counseling, counseling, university, vocational and developmental service activities, and interaction with practitioners and professionals as well as employers.

14. Admission criteria

- Average for graduates of preparatory school / scientific branch / agricultural vocational branch.

15. Key sources of information about the programme

- 1- **Book and textbook**
- 2- **Scientific catalogues**
- 3- **Scientific research and publishing paper**
- 4- **Internet**

Course Description Form

Course Description

This course description provides a brief summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, proving whether he or she has made the most of the available learning opportunities. It must be linked to the program description.;

| | |
|---|--|
| educational institution | Northern Technical University |
| Scientific Department / Center | Combating Deserification Techniques |
| Course Name/Code | Dry planting |
| Available Attendance Forms | Theoretical + Practical |
| Semester/Year | Quarterly |
| Number of credit hours (total) | 75 |
| Date of preparation of this description | 1/1/2024 |
| Course Objectives Introducing the student to the specifications of the dry environment, the method of production, the factors affecting it, and the modern techniques used in the investment and exploitation of dry lands. | |

Course Outcomes and Methods of Teaching, Learning and Assessment

A - Cognitive objectives

- 1- The student has knowledge about dry areas and their nature
- 2- Identify the available techniques to cope with drought
- 3- Identifying the nature of plants and their types and the extent to which they are affected by the environment of this region.

B - Skills objectives of the course.

- 1- The use of techniques to confront desertification and moisture tension

| |
|--|
| <p>2- The possibility of managing agricultural and livestock activity in dry agriculture areas in order to achieve the best possible efficiency</p> <p>3- Developing means, equipment and machinery in line with the nature of dry areas</p> |
| <p>Teaching and learning methods</p> |
| <p>Theoretical + Practical</p> |
| <p>Assessment methods</p> |
| <p>1- Theoretical exams (daily, monthly, final)</p> <p>2- Oral examinations</p> <p>3- Participation inside the hall</p> <p>4- Homework</p> |
| <p>Emotional and value goals</p> |
| <p>1- What the student studies should be commensurate with his tendencies and thinking directions</p> <p>2- The student should feel the importance of correcting refractive errors in the eye</p> <p>3- The student should listen carefully to the professor's explanation</p> <p>4- The student should feel what cognitive excellence and excellence mean</p> <p>5- The student should know the impact of science and scientists</p> <p>6- The student should care about respecting the time and class system</p> |
| <p>General and qualifying skills transferred (other skills related to employability and personal development).</p> |
| <p>1- Types of communication in the field of work</p> <p>2- The ability to express and convey ideas clearly and confidently</p> <p>3- Teamwork.</p> |

| Course Structure | | | | | |
|------------------|---------|----------------------------|--|---------------------|-------------------|
| The week | Hours | Required Learning Outcomes | Unit / Subject Name | Method of education | Evaluation method |
| 1 | 2 hours | Add Learning Outcomes | Drought and the nature of dry agriculture : drought, arid and semi-arid areas, the nature of drought and its causes, arid regions of the world | theoretical | Exams |
| 2 | 2 hours | Add Learning Outcomes | factors affecting production in dry agriculture : germination, soil, climate, temperature, light energy, atmospheric pressure, wind, rainfall, | theoretical | Exams |
| 3 | 2 hours | Add Learning Outcomes | Cloud intensification and rain projection in agricultural fields : methods of implementation, requirements required to implement the condensation process, existing uses of cloud condensation and rain projection. | theoretical | Exams |
| 4 | 2 hours | Add Learning Outcomes | Climate classification of the Arab world : agricultural climatic regions in the Arab world, | theoretical | Exams |
| 5 | 2 hours | Add Learning Outcomes | The role of water in plant growth : the importance of water for plants, factors affecting the absorption of water by plants, transpiration | theoretical | Exams |
| 6 | 2 hours | Add Learning Outcomes | Dehydration (water tension) : its effects on the plant, plant acclimatization of water tension | theoretical | Exams |
| 7 | 2 hours | Add Learning Outcomes | Development of dry agriculture : economic and social conditions in drying areas. | theoretical | Exams |
| 8 | 2 hours | Add Learning Outcomes | Crop breeding under dry cultivation conditions | theoretical | Exams |
| 9 | 2 hours | Add Learning Outcomes | field processes and agricultural mechanization in dry farming, | theoretical | Exams |
| 10 | 2 hours | Add Learning Outcomes | Agriculture in dry agriculture : municipal agriculture, mechanical farming, recent trends in agriculture , mulch cultivation , stuble mulch farming, Minimum tillage | theoretical | Exams |
| 11 | 2 hours | Add Learning Outcomes | Equipment and machinery suitable for crop production in dry agriculture | theoretical | Exams |
| 12 | 2 hours | Add Learning Outcomes | Moisture preservation and soil maintenance : factors affecting soil moisture conservation, methods used in moisture preservation, soil maintenance methods from erosion, erosion damage | theoretical | Exams |
| 13 | 2 hours | Add Learning Outcomes | Agricultural operations in dry farming , fertilizing under dry cultivation conditions | theoretical | Exams |
| 14 | 2 hours | Add Learning Outcomes | Pests in dry farming, weeds, insects | theoretical | Exams |
| 15 | 2 hours | Add Learning Outcomes | Agricultural rotations : their benefits and advantages of the agricultural cycle in dry agriculture | theoretical | Exams |

| 13. Infrastructure | |
|---|---|
| 1 Required textbooks | Lectures according to the prescribed curriculum |
| 2 Main references (sources) | Dry agriculture – its foundations – elements and investment / d. Abdullah Qasim |
| Recommended books and references (scientific journals, reports ,....) | |
| B Electronic references, websites | |
| 14. Course Development Plan | |
| <p>Working on training an academic staff capable of researching books and sources that dealt with delving into the fields of computers, networks and information technology and exerting the features of this experience to our dear students in order to enrich the scientific arena.</p> <p>2 Activating the issue of scientific twinning between the corresponding departments at the local and regional levels</p> <p>3 Activating electronic communication between our college and other college and corresponding entities, for the purpose of delivering information For the student as soon as possible.</p> <p>4 Work on the dissemination of distinguished graduation projects for second-year students in order to push the scientific movement in the direction Right</p> | |
