

## Academic Program Specification Form For The Academic

**University :** Northern Technical University

**Institute:** Technical college of Management / Mosul

**Department:** Statistics and Informatics Techniques

**Date of form completion:** 16/4/2024

**Dean`s Assistant for  
Scientific Affairs  
Dr. Ahmad Najm Sheet**

**Date:** 16/4/2024

**Signature**

**Quality Assurance and University performance manager  
Dr. Wijdan Hasan Hamoody**

**Date: / / Signature**

**Head of Department**

**Dr. Elham AbdulKareem Hussein**

**Date:** 16/4/2024

**Signature**

**Dean`s Name**

**Dr. Sameer Taha Yaseen**

**Date : 16/4/2024**

**Signature**

# HIGHER EDUCATION PERFORMANCE REVIEW: PROGRAMME REVIEW

## PROGRAMME SPECIFICATION

This description of the academic program provides a necessary summary of the most important characteristics of the program and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available opportunities. It is accompanied by a description of each course within the program .

|   |  |
|---|--|
| 1. Teaching Institution   | Technical college of Management / Mosul                                  |
| 2. University<br>Department/Centre  | Northern Technical University / Statistics and<br>Informatics Techniques |
| 3. Programme Title  | Statistics and Informatics Techniques                                    |
| 4. Title of Final Award   | Bachelor's Courses   |
| 5. Modes of Attendance<br>offered   |  |
| 6. Accreditation  |  |
| 7. Other external<br>influences   | Discussions - workshops - scientific visits                              |
| 8. Date of<br>production/revision of<br>this specification  | 16/4/2024  |
| 9. Aims of the Programme  |  |
| The student's ability to perform statistical analysis by dealing with raw data, organizing and tabulating it, then analyzing it and extracting results. |  |

## 10. Learning Outcomes, Teaching, Learning and Assessment Methods

### A. Knowledge and Understanding

- A1- Understanding the basic concepts and principles of statistics
- A2- Acquiring data analysis skills
- A3- Developing critical thinking and problem-solving skills
- A4- Giving the student the ability to use statistics in various fields
- A5- Developing awareness of the importance of ethics in the use of statistics

### B. Subject-specific skills

- B1 - Data collection and analysis skills
- B2 - Skills in using statistics programs
- B3 - Problem solving skills
- B4 - Creative and analytical thinking skills

### Teaching and Learning Methods

Lectures, laboratory, summer training, scientific visits, graduation projects.

### Assessment methods

Oral and written paper tests, semester exams, reports, daily exams, daily interaction in lectures, scientific student activities outside the scope of lectures.

### C. Thinking Skills

- C1- Developing a love of curiosity and scientific research by encouraging students to ask questions and search for answers
- C2- Developing a sense of social responsibility by helping students understand the importance of statistics in solving social problems
- C3- Developing communication and cooperation skills
- C4- Developing a sense of self-confidence by developing a sense of self-confidence and the ability to solve problems

### Teaching and Learning Methods

Lectures, laboratory (practical courts), summer training, scientific visits, graduation projects.

### Assessment methods

Paper oral and written tests, semester exams, reports, daily exams, daily interaction in lectures, scientific student activities outside the scope of lectures.

### D. General and Transferable Skills (other skills relevant to employability and personal development)

- D - General and qualifying transferable skills (other skills related to employability and personal development).
- D1- Critical thinking skills through the ability to analyze data logically and draw correct conclusions.
- D2- Technology use skills by enabling the student to use various statistics programs such as SPSS, R, and

others.

D3- The ability to learn independently and search for information.

D4- The ability to keep pace with developments in the field of statistics.

## Teaching and Learning Methods

Lectures, laboratory, summer training, scientific visits, graduation projects.

## Assessment Methods

Paper oral and written tests, semester exams, reports, daily exams, daily interaction in lectures, scientific student activities outside the scope of lectures.

## 11. programme structure

| stage           | Course name | Course name  | theoretical | practical |
|-----------------|-------------|--|-------------|-----------|
| level one       |             | Principles of mathematics                          | 2           | 2         |
|                 |             | Record numbers                                     | 2           | 2         |
|                 |             | Programming basics                                 | 2           | 2         |
|                 |             | Statistics and ready-made statistical applications | 2           | 2         |
|                 |             | Sports applications                                | 2           | 2         |
| Second Level    |             | Principles of probability                          | 3           | 1         |
|                 |             | Preview theory                                     | 2           | 2         |
|                 |             | Linear algebra                                     | 2           | 2         |
|                 |             | Principles of time series                          | 3           | 1         |
|                 |             | Differential equations                             | 2           | 2         |
|                 |             | Numerical Analysis                                 | 2           | 2         |
|                 |             | General time series                                | 3           | 1         |
|                 |             | Probability and random variables                   | 3           | 1         |
|                 |             | calculator apps (spss)                             | 2           | 2         |
|                 |             | Data structures                                    | 2           | 2         |
|                 |             | Hypothesis testing                                 | 2           | 2         |
| The third level |             | Principles of mathematical statistics              | 3           | 1         |
|                 |             | Operations research                                | 2           | 2         |
|                 |             | Linear regression analysis                         | 3           | 1         |
|                 |             | Principles of biostatistics                        | 3           | 1         |
|                 |             | Reliability  | 2           | 2         |
|                 |             | General mathematical statistics                    | 3           | 1         |
|                 |             | Nonlinear regression analysis                      | 3           | 1         |
|                 |             | General vital statistics                           | 3           | 1         |
|                 |             | Calculator applications (AR language)              | 2           | 2         |
|                 |             | Data mining  | 2           | 2         |
|                 |             | Queuing theory                                     | 2           | 2         |
| fourth level    |             | Design of experiments 1                            | 2           | 2         |
|                 |             | Design of agricultural experiments                 | 2           | 2         |
|                 |             | Random processes                                   | 3           | 1         |
|                 |             | Principles of statistical inference                | 3           | 1         |
|                 |             | Statistical inference                              | 3           | 1         |
|                 |             | Nonparametric methods                              | 3           | 1         |
|                 |             | Multivariate 1                                     | 3           | 1         |

|  |  |                         |   |   |
|--|--|-------------------------|---|---|
|  |  | Multivariate random     | 3 | 1 |
|  |  | Artificial intelligence | 2 | 2 |
|  |  | research project        |   | 2 |
|  |  | Information theory      | 2 | 2 |
|  |  | Teaching the machine    | 2 | 2 |

## **12. personal development Planning**

- 1- Access to modern scientific literature.
- 2- Participation in relevant scientific conferences.
- 3- Sending workers for training inside and outside the country.
- 4- Hosting specialized professors.
- 5- Scientific cooperation with other universities and corresponding colleges.

## **13. Admission criteria**

- 1- Mean
- 2- Scientific Department.

## **14. Key sources of information about the programme**

Study plan and approved academic vocabulary

## Curriculum Skills Map

## Course Description Form

### Reviewing the performance of higher education institutions (Academic Program Review)

#### Course description

This course description provides a necessary summary of the most important characteristics of the course and the learning outcomes expected of the student to achieve, demonstrating whether he has made the most of the available learning opportunities.

|  |   |           |
|--|---|-----------|
| 1. The educational institution   | Administrative College/Mosul  | Technical |
| 2. The university department/center  | Northern Technical University /<br>Department of Statistics and<br>Informatics Techniques |           |
| 3. Course name/code  | Principal of probability / SIT221   |           |
| 4. programs that are included in it  |   |           |
| 5. Attendance forms available  | weekly  |           |
| 6. season/year   | First and second semester   |           |
| 7. Study hours (total)   | 56 hours  |           |
| 8. The date this description was prepared  | 16/4/2024   |           |
| 9. Course objectives   |   |           |
|  |   |           |
| The course objective to enable the student to become familiar with the basics of probability and probability theory and possibility of applying them in practical life . |   |           |

|   |
|---|
| 10. Learning outcomes and methods of teaching, learning and assessment  |
| <p>A- Knowledge and understanding</p> <p>.A2- Probabilistic studies of some random correlations</p> <p>A3- The student's ability to know how to apply the subject in free life</p> <p>A4- It includes monitoring or relationships related to data, interpreting the relationship and its components, interpreting shapes and graphs, interpreting statistical tables.</p> |
| <p>b- Subject-specific skills</p> <p>B1 - Be skilled in solving probabilistic problems</p> <p>B2 - He should be skilled in knowing the type of distribution in which the data is .distributed</p> <p>B3 - Be skilled in determining the function of the data through distribution</p>   |
| <b>Methods of teaching and learning</b>   |
| lecture and simultaneous interaction, electronic laboratory based on electronic models for practical application, summer training   |
| <b>Evaluation modalities</b>  |
| Oral exams, written exams, semester exams, final exams, daily evaluation  |
| <p>C- thinking skills</p> <p>C1. The ability to use mental ability to solve problems</p> <p>C2- Using logical thinking</p>  |

|  |
|--|
| Methods of teaching and learning   |
| Electronic lecture, electronic laboratory, summer training   |
| Evaluation modalities  |
| Oral exams, written exams, semester exams, final exams, daily evaluation   |
| <p>D - General and transferable skills (other skills related to employability and personal development).</p> <p>D1. Developing the student's mental abilities</p> <p>D2- Developing skill capabilities</p> |

| 11. Course structure |       |                                     |   |                  |                   |
|----------------------|-------|-------------------------------------|---|------------------|-------------------|
| the week             | hours | required learning outcomes          | Name of the unit/course or topic  | education method | Evaluation method |
| the first            | 4     | Student understanding of the lesson | Group theory  | =                | =                 |
| The second           | 4     | =                                   | Basic counting methods, permutations  | =                | =                 |
| Third                | 4     | =                                   | Combinations  | =                | =                 |
| the fourth           | 4     | =                                   | Binomial expansion theorem  | =                | =                 |
| Fifth                | 4     | =                                   | exercises   | =                | =                 |
| Sixth                | 4     | =                                   | Polynomial theorem  | =                | =                 |
| Seventh              | 4     | =                                   | Exams   | =                | =                 |
| Eighth               | 4     | =                                   | Probabilities, probability concepts, random experiment, sample/event space, event probability | =                | =                 |
| ninth                | 4     | =                                   | Field and field algebra   | =                | =                 |
| The tenth            | 4     | =                                   | Axioms of probability, conditional probability  | =                | =                 |
| eleventh             | 4     | =                                   | Independence  | =                | =                 |
| twelveth             | 4     | =                                   | Random variables and their distributions  | =                | =                 |

|                   |   |   |   |   |   |
|-------------------|---|---|---|---|---|
| <b>fourteenth</b> | 4 | = | Probability function for a discrete random variable, distribution function for a discrete random variable     | = | = |
| <b>Fifteenth</b>  | 4 | = | Probability function for a continuous random variable, distribution function for a continuous random variable | = | = |
