Guide to Course Descriptions and Academic Programs for 2025

Academic Program Specification Form for The Academic Year 2024

University: Northern Technical University

Faculty/Institute: Al-dour Technical Institute

Department: Medical Laboratory Technica's

Name of the academic or professional program: Technical diploma in Medical Laboratory Technica's

Name of the final certificate: Technical diploma in Medical Laboratory Technica's

Academic system: Curriculum system

File preparation date: 26-1-2025

File filling date: 26-1-2025

Signature

The name of the head of the department
Assist. Lec. Asmaa Abdulhaq Mohammed

Signature

Dean's Assistant For Scientific Affairs
Assist. Prof. Dr. Hanan Shahb Ahmad

Quality Assurance and University Performance Division

Name of the director of the Quality Assurance and University Performance Division:

Signature

Asst. Lecturer Hayder Ali Mohssn

Dean's endorsement

Assist. Prof. Dr. Maha Elttayef Jasim

Vision of program
The department seeks to prepare technicians specialized in medical tests and medical laboratory management, who are prepared to work in government health departments and benefit from them at the scientific and applied levels.
Program message
<ol style="list-style-type: none"> 1. Preparing specialized technical, scientific and professional cadres within the field of laboratory work who are able to interact and keep pace with the development of scientific research and with a high level of responsibility towards the local and international community by providing medical services within laboratory specialization with all honesty and sincerity. 2. Working to refine the student's scientific and cognitive talents and benefit from them within laboratory specialization through training courses, workshops, and scientific visits to advanced health and educational institutions.
Program Goals
The department aims to graduate professional technical staff who have the ability to work in medical laboratories and perform simple routine laboratory tests and general biochemical examinations within various body fluids, as well as laboratory management and how to deal with and maintain laboratory equipment.
Program accreditation
The department is seeking programmatic accreditation.
External influences
Government and private sector

Program structure				
Program structure	Number of courses	Study unit	Percentage	Notes*
Foundation requirements	8	18	22.9%	Optional - Basic
Institute requirements	5	14	14.2%	Basic
Department requirements	22	64	62.9%	Optional - Basic
Summer training		Satisfied		Basic
Others	-	-	-	-

Program description				
Year / Level	Code of the course	Name of the course	Approved hours	
			Theoretical	Practical
First Level	MLT115	Analytical chemistry	1	2
	MLT113	Histology and cytological techniques	1	2
	MLT114	Medical laboratory instruments	1	2
	MLT118	Histology	1	2
	TID108	Safety in Labs. And workshop	2	-
	MLT117	Basic of nursing	1	2
	NTU102	Computer	1	1
	NTU101	English language	2	-
	NTU100	Human rights and democracy	2	-
	NTU103	Arabic language	2	-

Expected learning outcomes of the program	
Knowledge	
<ol style="list-style-type: none"> 1. Sufficient knowledge of most of the tests conducted in the laboratory, such as biochemical, immunological, and histological tests, and tests to detect various microorganisms such as bacteria, viruses, and parasites of various types, as well as learning about the physiology and anatomy of various body organs. 2. Correct and safe handling of chemicals, laboratory equipment and laboratory tools used within medical laboratories. 3. Learn safety procedures to avoid risks that may occur during laboratory work, as well as first aid and methods of applying it in emergency situations. 4. Correct and safe handling of various samples received into the medical laboratory to obtain the best results 	
Skills	
<ol style="list-style-type: none"> 1. Identify the various types of laboratory devices and equipment, how they work, and methods of maintaining them for the purpose of sustaining them for long periods. 2. Learn how to manage medical laboratories in a manner consistent with the accuracy of results and the speed of their completion, which ultimately benefits the patient's health. 3. Identify the methods and mechanisms for collecting various samples and ways to preserve them until specific tests are performed on them. 4. The ability to organize laboratory work and how to distribute tasks among individuals and departments of the medical laboratory. 	
Values	
<ol style="list-style-type: none"> 1. Enriching the student with the concepts and foundations of medical laboratory management. 2. Analyzing the problems and obstacles facing laboratory work and how to avoid their occurrence as much as possible. 3. Honesty in conducting tests and confirming information about laboratory samples and the safety of laboratory equipment to ensure obtaining accurate results. 4. Humane treatment of special medical cases in a way that preserves their dignity. 	

Teaching and learning strategies						
1. Explaining the scientific course in detail, using different means of explanation. 2. Seminars focusing on the latest scientific developments related to the course. 3. Field visits to medical institutions for the purpose of examining various disease cases and laboratory methods for diagnosing them.						
Evaluation methods						
1. Exams (weekly, monthly, daily, and the end-of-year exam), both theoretical and practical. 2. Providing monthly reports in various academic courses 3. Summer training						
Education Institution						
Faculty members						
Academic Degree	Specialization		Special requirements /skills		Faculty members	
	Major	Specialization			Staff	Lecturer
Assistant Professor	Biology	Physiology			٢	
Lecturer	Biology	Physiology			٢	
Lecturer	Biology	Molecular genetics			1	
Assistant Lecturer	Biology	Physiology			١	
		medical microbiology			١	
Assistant Lecturer	Applied science	Pathological analysis			2	
High diploma	science college	Pathological analysis			1	

Professional development
Orienting new faculty members
Participation in courses focusing on the integrity of the Arabic language, the nature of administrative work, and specialized courses within the field of laboratory work and the research field, in addition to courses on methods and validity of teaching.
Professional development for faculty members
<ol style="list-style-type: none"> 1. Participation in local and international conferences 2. Participation in applied courses and workshops within the department's specializations
Acceptance standard
<p>Students graduating from middle school are accepted through the central admission system on the basis of:</p> <ol style="list-style-type: none"> 1. Branch (scientific) 2. Average score

The most important sources of information about the program
<ol style="list-style-type: none"> 1. The website of the university and institute 2. University guide 3. Central Library 4. References and sources for the institute and the department 5. The World Wide Web
Program development plan
<ol style="list-style-type: none"> 1. Cooperation with various local and international universities 2. Updating the curriculum for courses in line with scientific development 3. Cooperation between local universities through postgraduate student's discussions 4. Cooperation with the Ministry of Health departments by supplying medical and technical personnel to teach in the department
