Course Objectives	 Introducing the student toprimary parasites (protozoa), methods of diagnosis and the diseases
	they cause, and familiarity with their
	epidemiological information, which helps to
	prevent and eradicate the prevailing parasitic
	diseases.
O Teaching and Learning Strategies	

9. Teaching and Learning StrategiesAdequate explanation of the course

- Daily Tests
- Student groups
- Field visits

10. Course Structure					
Week	Hours	Subject	Learning method	Attendance Forms	Evaluation method
First	3	Introduction to parasites	Explanation of the lecture with the presence of means of illustration and practical application	Classroom and laboratory	Exams
Second	3	Classification of parasites	Explanation of the lecture with the presence of means of illustration and practical application	Classroom and laboratory	Exams
Third	3	Host and its types	Explanation of the lecture with the presence of means of illustration and practical application	Classroom and laboratory	Exams

Fourth	3	Classification of protozoans and their specifications	Explanation of the lecture with the presence of means of illustration and practical application	Classroom and laboratory	Exams
Fifth	3	Roots	Explanation of the lecture with the presence of means of illustration and practical application	Classroom and laboratory	Exams
