البحوث المنشورة للأعوام الدراسية ٢٠٢٠-٢٠٢٥

اسم المجلة	عنوان البحث	اسم الباحث	ت
International Journal on "Technical and Physical Problems of Engineering" (IJTPE)	EXTENDING TWO STEPS ANAEROBIC DIGESTION MODELS TO INCORPORATE SURFACE AREA EFFECT	د. عمار حسن سهيل	١
International Journal on "Technical and Physical Problems of Engineering" (IJTPE)	EXPERIMENTAL COMPARISON OF THERMAL PERFORMANCE BETWEEN V-CORRUGATED AND FLAT PLATE SOLAR COLLECTORS		
Frontiers in Heat and Mass Transfer	CFD ANALYSIS FOR ANAEROBIC DIGESTION INSIDE A BATCH DIGESTER AUGMENTED WITH EXTENDED SURFACES		
Energy	Solar air heater energy and exergy enhancement using a v-corrugated wire mesh absorber: An experimental comparison		
International Journal of Heat and Technology	Experimental Investigation on the Effect of Sawdust Particles Size on Its Thermal Conductivity		
Tikrit Journal of Engineering Sciences	Performance Augmentation of Household Batch Digester using a Circular Horizontal Extended Surface		
CFD Letters	CFD Analysis of Improving Air Conditioning System Performance by Adding SiO ₂ Nanoparticles to the Compressor Oil		
Frontiers in Heat and Mass Transfer	SIMULATION AND INVESTIGATION OF NANO-REFRIGERANT FLUID CHARACTERISTICS WITH THE TWO-PHASE FLOW IN MICROCHANNEL	أحمد مصطفى سليم	٢
Materials today: Proceedings	Effect of suction or blowing on velocity and temperature distribution of flow over a flat plate		
International Journal of Fluid Machinery and Systems	Numerical Analysis of Standard - Unstandard Gears for an External Gear Pumps		
Frontiers in Heat and Mass Transfer	NUMERICAL INVESTIGATION OF NUSSELT NUMBER FOR NANOFLUIDS FLOW IN AN INCLINED CYLINDER		
Frontiers in Heat and Mass Transfer	Performance of Thermal Insulation of Different Composite		

	Walls and Roofs Materials Used for Energy Efficient Building Construction in Iraq		
Applied Thermal Engineering	Performance of compound parabolic concentrator solar air flat plate collector using phase change material		
Frontiers in Heat and Mass Transfer	SIMULATION AND INVESTIGATION OF NANO-REFRIGERANT FLUID CHARACTERISTICS WITH THE TWO-PHASE FLOW IN MICROCHANNEL		
Frontiers in Heat and Mass Transfer	THERMAL PERFORMANCE ENHANCEMENT OF HEAT PIPE HEAT EXCHANGER IN THE AIR-CONDITIONING SYSTEM BY USING NANOFLUID	د. اياد سليمان عبد الله	٣
International Communications in Heat and Mass Transfer	Numerical and experimental investigation on mixed convection heat transfer inside cavity heated from below with reciprocating moving upper surface		
Results in Engineering	Impact of CuO+H₂O nanofluid on the cooling towers performance with varying packing densities		
Energy Technology	Enhancement the Performance of the Heat Sink by Using Metal Foam Partially Immersed in Phase Change Materials for Different Porosities		
Journal of Applied Research and Technology (JART)	Obstacle arrangements effect on the mixed convection in an enclosure with movable top surface		
International Communications in Heat and Mass Transfer	Experimental investigation for utilization of U-shaped heat pipe heat exchanger in the air-conditioning system		
AIP Conference Proceedings	A numerical investigation on the effect of nano metal oxide coating fins on the thermal performance of heat pipe heat exchanger		
Case Studies in Thermal Engineering	Mixed convective of hybrid nanofluids flow in a backward-facing step		
Frontiers in Heat and Mass Transfer	FREE CONVECTIVE HEAT TRANSFER CREATED FROM HEATED CYLINDER IMMERSED INSIDE DUCT COOLED FROM SIDE	د. قيس عبد يوسف	٤
Heat Transfer	A thermal nonequilibrium model to natural convection inside non-Darcy porous layer surrounded by horizontal heated plates with periodic boundary temperatures		
Frontiers in Heat and Mass Transfer	THE IMPACT OF ALUMINA NANOPARTICLES SUSPENDED IN ETHYLENE GLYCOL ON THE	فراس عزيز علي	٥

	PERFORMANCE EFFICIENCY OF A DOUBLE PIPE HEAT EXCHANGER		
Applied Thermal Engineering	Experimental study of compound parabolic concentrator with flat plate receiver		
International Journal on“Technical and Physical Problems of Engineering”(IJTPE)	EXPERIMENTAL COMPARISON OF THERMAL PERFORMANCE BETWEEN V-CORRUGATED AND FLAT PLATE SOLAR COLLECTORS		
International Journal of Heat and Technology	Friction Factor and Heat Transfer Enhancement of Hybrid Nanofluids in a Heated Circular Tube		
Ain Shams Engineering Journal	Performance analysis of Pelton turbine under different operating conditions: An experimental study		
Journal of Advanced Research in Applied Mechanics	Comparative Analysis of Fuzzy Logic, PID, and FOPID Controllers in DC Microgrid Voltage Regulation for Power Plants: Integrating Renewable Energy Sources		
Journal of Materials Research and Technology	Effect of sugar palm fibers on the properties of blended wheat starch/polyvinyl alcohol (PVA) -based biocomposite films	د. ياسر حسن علي	٦
IEEE Xplore	Novel spiking neural network model for gear fault diagnosis		
International Journal of Heat and Technology	Effect of the Cross-Sectional Shape on the Dynamic Response of a Cantilever Steel Beam Using Three Modal Analysis Methods		
Results in Materials	Mechanical properties and suitability of PLA for 3D-printed dental implants: Experimental and simulation analysis		
AIP Conference Proceedings	Diagnosis model for bearing faults in rotating machinery by using vibration signals and binary logistic regression		
IEEE Xplore	Fault Detection of Bearing using Support Vector Machine-SVM		
Journal of advanced research in fluid mechanics and thermal sciences	A review in particle image velocimetry techniques (developments and applications)		
journal of human earth and future	Analysis of the generated output energy by different types of wind turbines	د. عمر عبد الهادي مصطفى	٧
International Journal of Heat and Technology	Experimental Investigation on the Effect of Sawdust Particles Size on Its Thermal Conductivity		
E3S Web of Conferences	Practical study on heat pump enhancement by the solar energy		
AIP conference proceedings	An Experimental Study on Performance Analysis of Solar Water Distiller System Using Extended Fins under Iraq Climatic Conditions	مثنى مهدي محمد صالح	٨

Energy Storage	Performance analysis of single-pass solar air heater thermal collector with adding porous media and finned plate		
Journal of Energy Storage	Efficiency enhancement of solar air heater collector by modifying jet impingement with v-corrugated absorber plate		
Ain Shams Engineering Journal	Performance analysis of Pelton turbine under different operating conditions: An experimental study		
International Journal of Energy Research	Improving the performance of solar air heater using a new model of V-corrugated absorber plate having perforations jets		
<i>International Journal of Mechanical Sciences</i>	Impacts of adding porous media on performance of double-pass solar air heater under natural and forced air circulation processes		
Solar Energy	Performance analysis of triple-pass solar air heater system: Effects of adding a net of tubes below absorber surface		
Applied Thermal Engineering	Experimental study of compound parabolic concentrator with flat plate receiver	د.حارث ماهر عبد	٩
Energy Storage	Performance analysis of single-pass solar air heater thermal collector with adding porous media and finned plate		
Journal of Energy Storage	Efficiency enhancement of solar air heater collector by modifying jet impingement with v-corrugated absorber plate		
International Journal of Ventilation	Impacts of geometric configurations on performance of discharge coefficient and wall pressure of Venturi meter under high Reynolds number		
Ain Shams Engineering Journal	Performance analysis of Pelton turbine under different operating conditions: An experimental study		
International Journal of Energy Research	Improving the performance of solar air heater using a new model of V-corrugated absorber plate having perforations jets		
Heat Transfer	A thermal nonequilibrium model to natural convection inside non-Darcy porous layer surrounded by horizontal heated plates with periodic boundary temperature	عمر سعدون خليل	١٠
CFD Letters	Enhancement of Double-Pipe Heat Exchanger Effectiveness by Using Porous Media and TiO ₂ Water		
NTU Journal of Engineering and Technology	Enhancement of double-pipe heat exchanger effectiveness by using water-CuO		
International Journal on "Technical and Physical Problems of Engineering" (IJTPE)	ENERGY CONVERSION OF V-CORRUGATED ABSORBER PLATE SOLAR AIR HEATER WITH PHASE CHANGE MATERIAL		

International Journal of Heat and Technology	CFD-based numerical performance assessment of a solar air heater duct roughened by transverse-trapezoidal sectioned ribs	بهجت حسن الياس	١١
International Journal of Fluid Machinery and Systems	Numerical Analysis of Standard -Unstandard Gears for an External Gear Pumps		
<i>Asia-Pacific Journal of Chemical Engineering</i>	Optimizing of heat transfer and flow characteristics within a roughened solar air heater duct with compound turbulators		
Frontiers in Heat and Mass Transfer	Performance of Thermal Insulation of Different Composite Walls and Roofs Materials Used for Energy Efficient Building Construction in Iraq		
International Communications in Heat and Mass Transfer	Impact of using single heated obstacle on natural convection inside porous cavity under non-Darcy flow and thermal non-equilibrium model: A comparison between horizontal and vertical heated obstacle arrangements	نور منير بشير	١٢
Materials today: Proceedings	Effect of suction or blowing on velocity and temperature distribution of flow over a flat plate		
Heat Transfer	Conjugate local thermal nonequilibrium and non-Darcy flow inside porous enclosure: Analysis of localized heating and cooling arrangements		
International Communications in Heat and Mass Transfer	Impact of using single heated obstacle on natural convection inside porous cavity under non-Darcy flow and thermal non-equilibrium model: A comparison between horizontal and vertical heated obstacle arrangements		
International Journal of Thermal Sciences	Natural convection heat transfer from a bank of orthogonal heated plates embedded in a porous medium using LTNE model: A comparison between in-line and staggered arrangements		
International Journal of Mechanical Sciences	Analysis of effects of Thermal Non-Equilibrium and Non-Darcy Flow on Natural Convection in a Square Porous Enclosure Provided with a Heated L Shape Plate	انوار احمد يوسف	١٣
Heat Transfer	Conjugate local thermal nonequilibrium and non-Darcy flow inside porous enclosure: Analysis of localized heating and cooling arrangements		
Materials today: Proceedings	Effect of suction or blowing on velocity and temperature distribution of flow over a flat plate		
International Journal of Thermal Sciences	Natural convection heat transfer from a bank of orthogonal heated plates embedded in a porous medium using LTNE model:		

	A comparison between in-line and staggered arrangements		
International Journal of Mechanical Sciences	Analysis of effects of Thermal Non-Equilibrium and Non-Darcy Flow on Natural Convection in a Square Porous Enclosure Provided with a Heated L Shape Plate		
International Communications in Heat and Mass Transfer	Impact of using triple adiabatic obstacles on natural convection inside porous cavity under non-darcy flow and local thermal non-equilibrium model		
International Communications in Heat and Mass Transfer	Impact of using triple adiabatic obstacles on natural convection inside porous cavity under non-darcy flow and local thermal non-equilibrium model		
Results in Engineering	Impact of CuO+H ₂ O nanofluid on the cooling towers performance with varying packing densities	اسماء طه حسين	١٤
Case Studies in Thermal Engineering	Enhancement performance of vapor compression system using nano copper oxide lubricant inside compressor and a fluidized bed for condenser cooling		
Journal of Thermal Analysis and Calorimetry	Experimental investigation for vapor compression system performance enhancement through condenser cooling by using shallow fluidized bed		
International Journal of Heat and Technology	Experimental Investigation on the Effect of Sawdust Particles Size on Its Thermal Conductivity	حسام نوفل صالح	١٥
International Journal of Mechanical Sciences	Impacts of adding porous media on performance of double-pass solar air heater under natural and forced air circulation processes		
Results in Engineering	Impact of CuO+H ₂ O nanofluid on the cooling towers performance with varying packing densities		
International Journal of Ventilation	Impacts of geometric configurations on performance of discharge coefficient and wall pressure of Venturi meter under high Reynolds number		
Case Studies in Thermal Engineering	Mixed convective of hybrid nanofluids flow in a backward-facing step		
Solar Energy	Performance analysis of triple-pass solar air heater system: Effects of adding a net of tubes below absorber surface		
Asia-Pacific Journal of Chemical Engineering	Optimizing of heat transfer and flow characteristics within a roughened solar air heater duct with compound turbulators	بنان نجم الدين عبد الله	١٦

CFD Letters	CFD Analysis of Improving Air Conditioning System Performance by Adding SiO ₂ Nanoparticles to the Compressor Oil
