

Northern Technical University

Mosul Polytechnic College

Department of Prosthetics and Orthotics Techniques

Admission plan of the Department for the Academic Year of 2025-2026

- The first stage admission plan will be for (150) students, provided that the admission is within the central admission plan of the Ministry of Higher Education and Scientific Research.
- Graduates of the Preparatory School's Applied Scientific Branch, the Biological Branch, and the Vocational Preparatory in the Medical Devices Department are accepted.
- The duration of the study is two academic years with a course system, and it includes theoretical and practical study along with summer training during the summer break.
- The top ten graduates in the Medical Devices Engineering Technologies Department and the equivalent medical colleges and engineering technical colleges are appointed (for further study/employment).
