WELCOME TO

The Kamaus from KENYA

PROFILE

FATHER: Boniface Kigotho Kamau, 35

MOTHER: Pauline Wanjiku, approximately 29 (exact age unknown)

DAUGHTER: Joyce Muthoni, 8

DAUGHTER: Sharon Wanjiru, 16 months

Boniface and his wife, Pauline, live in Ongata Rongai, a small town near the capital, Nairobi. They have two daughters: Joyce, who is in her third year of school, and 16-month-old Sharon.

Their home is a two-bedroom apartment, one of 20 in a **single-storey** block. Boniface works as a taxi driver at the international airport in Nairobi. Each morning he leaves home at 4.30am in his white Toyota – **cracked** windscreen, 200,000 miles on the clock – and is back by 10pm. On a good day he finds two clients. In a typical month he takes home about £140.

‘It’s a hard job but I like it,’ he says. ‘I meet new people, so I get some experience of the world – even though I have never been outside Kenya.’

Pauline is a **dressmaker** but isn’t working at the moment. She stays at home to look after the kids. The weekend is often the only time Boniface sees Joyce and Sharon. Boniface and Pauline met in 1994: ‘We liked each other immediately,’ says Boniface. ‘I didn’t want a woman from the city so when I learned that Pauline was from the country, I was pleased.’

They married in 1995 and at first they lived in a **slum**, and often didn’t have a lot to eat, just sukuma wiki (a green vegetable). Then, in 1996, Boniface won £60 in a cycle race. The money helped them move house to a better area and paid for driving lessons so that Boniface could become a taxi driver.

His salary doesn’t go far. Rent is £30 a month, and he gives the same amount to his parents, who don’t work. Also, as the most successful of six brothers and sisters, Boniface is expected to help their families too. He says, ‘I am always so **stressed** about money.’ Joyce’s school fees cost another £25 a month.

‘We are trying to give our children the best education,’ says Pauline, who, like her husband, never finished school. ‘Joyce wants to be a doctor.’

Next year, Sharon is going to preschool, so Pauline will have more time to start her own dressmaking business. By then, the family might have a new home. ‘This apartment is not a good place to raise a family,’ says Boniface. ‘The toilets are **communal** – one for every four families.’ Boniface plans to build a three-bedroom house in the suburbs of Nairobi.

THE FAMILY ARE HAPPIEST WHEN they have a bit of spare money: Boniface takes them to see the wild animals at Nairobi National Park.

OUR WORLD

The Qus from Beijing, CHINA

FATHER: Qu Wansheng, 44

MOTHER: Liu Guifang, 43

DAUGHTER: Chen, 17

GRANDFATHER: (Qu's father) Huanjun, 84

PROFILE

Qu and Liu have known each other since childhood. The most noticeable change in China since then is the size of families. Qu was the youngest of six. Liu grew up as one of five children. But they have only one daughter.

Unlike many Chinese parents, Qu and Liu are happy to have a girl. However, like most parents in China, they put the needs of their only child, Chen, first. She is trying for a place at the prestigious Beijing University. Qu, a propaganda officer at the municipal services bureau, and Liu, who works at the No. 3 computer factory, are saving every last yuan for their daughter's education.

The family have lived in their house in central Beijing for 70 years. It is in one of the capital's ancient Hutong **alleyways**. These are known for their **close-knit** families and warm hospitality. The elderly sit outside and chat. People wander to the shops in their pyjamas. It is a way of life **cherished** by Qu, but he can see that this relaxed routine is increasingly out of step with a nation experiencing one of the most amazingly quick changes in human history.

'We are not in a hurry to get rich,' says Qu. 'I don't want to rush around trying to make money – I am not a machine. I put my family first.'

Tens of thousands of alleyways have been knocked down in the past few years, and their house is said to be next for **demolition**. And when the old communities go, the traditional family structure, in which children look after their elderly parents at home, goes too.

But for now, the Qus keep the old ways. The grandfather, Qu Huanjun, 84 and **frail**, is the centre of the family. 'My father lives here so this is the headquarters of the family,' says his son. 'My brothers and their families come to visit most weekends. We are very close.'

They are sad that their daughter has grown up alone because the one-child policy forbids them from having any more. 'Our daughter is lonely,' says Liu. 'I always wanted to have two children.'

Qu and Liu are proud of their daughter. Chen is bright and well-balanced. She wants to study archaeology. 'University will cost a great deal of money,' says her father. 'So we try to live **frugally** and save for our daughter.'

5

I go surfing whenever I'm not working. Sometimes I'm on the beach before 7.00 in the morning. I go all over the world surfing. Next month I'm going to Costa Rica, and in the autumn I'm going to Thailand.

6

I've got a surf school. I teach all ages, from kids to pensioners. The business is doing well. I'm also opening two shops that sell surfboards. The boards are made in South Africa. They're the best.

7

I like Sundays best of all. I work as a lifeguard all day, then around 6.00 me and my mates barbecue some fish and have a few beers. Fantastic! I've been all round the world, but when I look around me, I think there's nowhere else I'd rather be.

future King Prince of Wales . . .

The life of a hard-working future King

His eccentric habits are known to the world, but the Prince of Wales has every reason to feel content. A man with wide interests and deep passions, he is finally happily married. **DANIELLA KENT** reports.

- 1 **P**RINCE CHARLES is often portrayed as bad-tempered and spoilt. There are stories that every day seven eggs are boiled for his breakfast so that he can find one that is cooked just the way he likes it. His toothpaste is squeezed onto his toothbrush for him. And his bath towel is folded over a chair in a particular way for when he gets out of his royal bath.

He has an enormous private staff – secretaries, deputy secretaries, press officers, four valets, two butlers, housekeepers, two chefs, two chauffeurs, ten gardeners, an army of porters, handymen, cleaners and maids. They are expected to get everything right. When HRH (His Royal Highness) feels they have performed their duties well, they are praised in a royal memo. But if they have made mistakes, they are called into his study and told off. The Prince can get so angry that he has been known to have tantrums, throwing things and screaming with rage.

The private and public man

- 2 Charles is eccentric, and he admits it. He talks to trees and plants. He wants to save wildlife, but enjoys hunting, shooting, and fishing. He dresses for dinner, even if he's eating alone. He's a great socializer. Poets, artists, writers, broadcasters, politicians, actors and singers all eat at his table. Arriving at Highgrove, his family home, on a Saturday afternoon in time for a stiff Martini, guests are entertained in the height of luxury. They are then sent on their way before lunch on Sunday, having been shown round his beautifully-kept gardens.

The Prince also entertains extravagantly at Sandringham, one of the Queen's homes, at least twice a year. There are picnic lunches on the beach, expeditions to local churches, and lavish dinners with organic food from Highgrove. Conversation is lively, but the heir to the throne has to be careful what he says, because he knows only too well that anything he says in private may be repeated in public.

The future monarch that we don't see is a man of great humour, who cares passionately about the state of the British nation, and is devoted to his two children, William and Harry. He is madly in love with 'his darling wife', which is how he refers to Camilla in public.

A dutiful life

- 3 Together Charles and Camilla perform royal duties, both at home and abroad. He attends over 500 public engagements a year. He visits hospitals, youth groups, performing artists, charities, and business conferences. He hosts receptions to welcome visiting heads of state and VIPs. He travels abroad extensively, as an ambassador to the United Kingdom, representing trade and industry. He works hard to promote greater understanding between different religions. He is also President of the Prince's Charities, which are active in promoting education, business, the environment, the arts, and opportunities for young people. The group raises over £110 million annually.

Camilla shares Charles' passion for hunting, and also his interest in conservation of towns and countryside. The one thing she leaves to Charles is skiing. She prefers to stay at home when he makes his annual trip to Klosters in Switzerland.

Everything except the top job

- 4 Since his second marriage, Prince Charles has everything he wants except, as Diana (who was killed in a car accident in 1997) used to call it, 'the top job'. Yet despite not being on the throne, he has worked hard to accomplish so much. He is concerned about the state of the country he loves, and shows his frustration that governments do little to tackle those problems about which he feels so strongly.

The Prince of Wales has his own food company, Duchy Originals. It originally sold biscuits, but is now expanding to become one of Britain's best-known and most successful organic brands, with over 200 different products, including food, drinks, and hair and body care products.

Charles, well-intentioned, hard-working, conservative and old-fashioned, continues to do his duty as he sees it. But he is no longer alone. One day he will be King, and his darling Camilla will be HRH The Princess Consort.

- 5 Now you have read the article, have you changed your mind about any of your answers in exercise 3?

Vincent

Vincent Van Gogh, the genius unrecognized in his own lifetime

Vincent Van Gogh was born in Brabant in the Netherlands in 1853. As a young man he worked as an art dealer in London and Paris. He was dismissed from this job because he had argued with customers about art.

In 1881 he tried to commit suicide. He was depressed because he had fallen in love with his cousin, but she had rejected him.

In 1886 he went to Paris to study art, and it was while he was studying that he met Degas, Pissarro, Seurat, Toulouse-Lautrec, Monet, and Renoir.

After two years in Paris, Van Gogh went to live in Arles in the south of France. His friend and fellow painter, Gauguin, who he had met in Paris, came to join him. The two men settled down in Arles, but there was a lot of tension between them. Vincent used to drink heavily, and they quarrelled fiercely, mainly about the nature of art.

One evening in December 1888, Van Gogh left the house carrying a razor blade. He'd been drinking, and he'd had an argument with Gauguin. He cut off part of his ear.

After this, he moved voluntarily into an asylum for the insane at St-Rémy-de-Provence. He used to wake up at six in the morning and go out to paint. It was here, in the last two years of his life, that many of his most famous paintings were completed. These included *Starry Night*, *Irises*, and *Self-Portrait without a Beard*.

In 1890 he left the warm south and moved to Auvers-sur-Oise. Here he continued working despite his growing depression. It was while he was painting outside that Vincent shot himself in the chest. Two days later, he died. He was buried in the cemetery in Auvers.

When Van Gogh died, he had no money because he'd only sold one of his paintings, *The Red Vineyard*, in his entire life. His sister-in-law took his collection to Holland, where his work was published. He was instantly recognized as a genius.

I Many years ago, in the ancient Italian city of Verona, there were two very rich but warring families, the Montagues and the Capulets. They had hated each other for so long that no one could remember how the feud had started. Fights often used to break out in the streets.

4 As dawn broke, Romeo raced to Friar Laurence and begged him to marry them. The Friar agreed, hoping this would unite the families. That afternoon, Juliet joined Romeo, and the lovers were wed. They parted, but planned to spend that night together.

7 Next morning the lovers could hardly bear to part. When would they meet again? More disaster was to come. Juliet learned that her father had agreed to give her in marriage to a nobleman, Paris. How could she tell her father she had already married Romeo?

10 But Romeo never received the Friar's letter. Thinking that his beloved Juliet had died, he bought poison and went to the tomb. He saw his beautiful, lifeless Juliet. He would never leave her side. He kissed her, and drank the poison.

2 Lord Capulet was planning a celebration for his daughter, Juliet. Romeo, Lord Montague's son, went to the party uninvited. He saw Juliet and fell instantly in love! They touched hands. They talked. They kissed. Only then did they discover their families were enemies!

3 That night Juliet stood on her balcony and declared her love for Romeo. Romeo had climbed up a wall and was listening. They swore eternal love to each other, and promised to marry in secret the next day.

5 Returning to Verona, Romeo found his friends, Benvolio and Mercutio being attacked by Tybalt, Juliet's cousin. Romeo tried to stop the fight. He failed, and Mercutio was killed. Romeo had to take revenge! He fought Tybalt and killed him.

6 The Prince, hearing of the deaths, banished Romeo from Verona. Poor Juliet! Her husband had killed her cousin, and now he was exiled. She was desperate. Her nurse brought Romeo to Juliet so they could be together one last time.

8 Juliet ran to Friar Laurence for help. The Friar gave her a sleeping potion to make her appear dead for forty-two hours, so she couldn't marry Paris. The Friar would tell Romeo the plan, and he would arrive as she was waking up. They could then escape together.

9 Juliet returned home and pretended to agree to the marriage. She took the drug. The next day, everyone thought she was dead. She was carried to the family tomb, from where, according to the Friar's plan, Romeo would rescue her.

11 Juliet woke up to see Romeo lying dead beside her. She wept and kissed him again and again, hoping that the poison on his lips would kill her too. Finally she took his dagger and, stabbing herself, fell dead upon her husband's body.

12 The families of the Montagues and the Capulets arrived at the tragic scene. They were overwhelmed with grief, and horrified at the pain that their families' hatred had caused. Thus they buried their feud, along with their precious children, Romeo and his sweet Juliet.

Education in Victorian England 1832–1901

In Victorian England education played a very small role in most children's lives. In 1840 only 20% of children had any schooling at all. Then, in 1870 an Education Act was passed which said that children aged 5–10 should attend school. However, many parents preferred their children to work and earn money for their families. It was not until 1880 that all children had to attend school until the age of 10. Then, in 1899 the school leaving age was raised to 12.

Kids who have it all

GO BACK JUST THIRTY YEARS and look inside a child's bedroom. What do you see? Some books, a few dolls or toy cars, some cuddly animals, and perhaps a desk. Look inside the bedroom of today's kids and it's a 21st century space station.

Computers and other hi-tech toys can make a youngster's bedroom the most expensive room in the house. But it's not only electronic items that push up the value. Today's children also have sports equipment, designer clothes, and accessories such as sunglasses, watches and jewellery. Do they have everything and appreciate nothing? A TV channel tried an experiment. TANYA BOWERS REPORTS

Back to the 1970s

- 1 The TV company, Channel 4, transported a typical 21st century family back in time to the 1970s. The Gregory family live in a large house in Milton Keynes. Fifteen years ago the father, Jon, set up his own business and made a fortune. The children, Hannah, 12, and Josh, 10, have huge bedrooms full of expensive hi-tech toys and clothes. They don't have to help at all with the running of the house.
- 2 This is all very different from Jon's childhood in the 70s. He grew up in a small council house in Leeds, one of five children brought up by their father after his mother died. Discipline, order and thrift ruled his life. "We ate what we were given. We walked to school and we had to share all the household chores. We had to do what we were told. Dad was very strict."
- 3 The TV company transformed the Gregorys' house and their lives. For two weeks the family had to go back to the 70s and live Jon's childhood. The house was stripped of all modern gadgets and equipment. Hannah and Josh had to wash and iron their own clothes, do all the washing-up, and help dig the vegetable garden. The family car was exchanged for a battered, old VW van and they had to live on just £39 a week.
- 4 At first there were tears and furious rows as the children tried to adjust. Hannah couldn't believe that she wasn't allowed to buy hair mousse and was horrified to find her wardrobe emptied, leaving her with just jeans, two tops and a 'Sunday Best'. Josh had to give up watching his wide-screen television and take up the piano. They didn't have to walk to school but were filled with embarrassment when their dad drove them to the school in their 'new' van.
- 5 However, gradually Hannah and Josh learnt to appreciate small treats. They enjoyed eating the vegetables they'd dug up from the garden. They made some extra money by selling cookies they'd baked to their neighbours. They started to save rather than spend and understand the value of a £90 pair of trainers.

What should today's parents do?

It's difficult to get things right as a parent. Jon says: "We shouldn't give in to our kids' demands. There's no feeling like getting something you've worked really hard for." Hannah now has £30 in the bank, all earned by doing extra jobs round the house. She has learnt some valuable lessons about life and she doesn't buy hair mousse any more!

Life in

An international group of forty scientists have made some very surprising predictions about the future. They say that in the next fifty years the way we live will change beyond our wildest dreams. Here are some of their predictions. You may find some of them surprising.
BEA ROSENTHAL reports.

1 Life expectancy

Within 50 years, living to a 100 while still enjoying active, healthy lives will be the norm. Professor Richard Miller of the University of Michigan says: ' We will be able to do the same for humans.' So with regular injections, centenarians will be as vigorous as today's sixty-year-olds. Women will be able to give birth well into old age; their biological clocks could be extended by ten years.

2 Growing body parts

Professor Ellen Heber-Katz says: 'People will take for granted that injured or diseased organs can be repaired in much the same way as we fix a car. Damaged parts will be replaced. Within 50 years whole-body replacement will be routine.' But doctors will need huge supplies of organs for transplant. Where will they come from? Scientists say these could be grown inside animals from human cells.

3 Understanding the brain

We don't yet know how the brain gives us our awareness of being alive. 'But,' says Professor Susan Greenfield of Oxford University, 'in 50 years' time we may have a clearer idea of how the brain generates consciousness.' Studies of the brain and the nature of consciousness will bring much greater understanding of disorders such as schizophrenia and depression. Other scientists go further than Professor Greenfield. They believe that by 2060 computers will develop their own consciousness and emotions. Human beings may eventually be replaced by computers in some areas of life.

2060

4 Understanding animals

Thanks to a device which can 'read' emotions, feelings, and thoughts, we will be able to 'talk' to animals. The story of *Dr Dolittle will be fact, not fiction. 'This could first work with primates, then mammals, then other vertebrates, including fish,' says Professor Daniel Pauly from Canada. '[redacted]', so we might all become vegetarian.'

* fictional character for children

5 Discovering aliens

A number of scientists predict that the biggest breakthrough in the next 50 years will be the discovery of extra-terrestrial beings. Dr Chris McKay of NASA says: 'We may find evidence of alien life frozen in the ancient permafrost on Mars.' Scientists hope that the current interest in space missions to this planet means that there is every chance of making [redacted]. Dr McKay also believes that evidence of alien life forms may even be found here on Earth.

6 Parallel universes

Advances in quantum physics will prove that there are parallel universes. In fact there may be an infinite number of them. These universes will contain space, time, and some of them may even contain you in a slightly different form. For years parallel universes only existed in the works of science fiction, but now Professor Max Tegmark says: '[redacted]':

7 Our homes

What might our houses be like in the second half of the 21st century? This is Professor Greenfield's prediction:

As you enter the living room, sensors will detect your presence and the walls will start to glow. Talk to the walls and, activated by your voice, they will change to a colour of your choice, 'pink' to 'green' to 'blue', whatever suits your mood.

Sink into your glowing cyber-armchair, relax in the knowledge that the house computer will perform all your everyday household tasks. The voice system in the chair will address you by name and advise a change in position that will be better for your spine.

In the kitchen, [redacted] and it will automatically send orders to the supermarket. However, it is in the kitchen where 'new' meets 'old'. Food remains in its old-fashioned form. Pills, so confidently predicted in the 20th-century to replace food, exist, but nobody wants them. There is too much pleasure in cooking, chewing and tasting all kinds of food.

Finally

Predicting the future has occupied mankind for generations. However, not always successfully. The huge influence of many of today's technical marvels, such as the Internet or mobile phones, was never predicted.
